ROYAL ACADEMY OPERA: THE RAKE'S PROGRESS

Marylebone Road, NW1 5HT
ram.ac.uk

Conducted by Trevor Pinnock and directed by Frederic Wake-Walker, Royal Academy Opera students perform Stravinsky's only English language opera – a work inspired by William Hogarth's engravings, with lyrical input from the poet WH Auden.

- 2. EXHIBITION

A show featuring six female artists, linked by their fascination with the creative possibilities of light. Tamar Frank presents a series of small light panels whose central focus blends into different colour compositions. Chila Singh Burman examines the symbolic power of the peacock. Karolina Halatek's immersive installation based on a rare astronomical phenomenon. Kate McMillan's film explores the life of a cave-dwelling girl. Jacqueline Hen creates the illusion of an infinite space, inspired by how the digital realm warps perception. Lauren Baker's six-image lenticular, backed by an LED light box, depicts "a galactic explosion of shooting stars and space matter".
